

I would like to make sure that LPFM stations are not given the ability to take precedence over national/regional FM services -- e.g., those transmitted via FM translators. Specifically I listen to the national radio service provided by K-LOVE (104.3FM, 96.9FM, and 102.3FM, in my area) on a regular basis. K-LOVE provides the ability to listen to a non-mainstream music genre (non-commercial Christian music) that might otherwise be difficult to support in my area (due to the fact that it is supported via listener donations). K-LOVE provides a positive music option to which the whole family can listen, without fear of children hearing things they shouldn't. Additionally, being a nationally-oriented station, K-LOVE provides better information to national and global news than many local stations. K-LOVE and other national FM stations provided via FM translators provide a great service to the community, and I ask that you not allow these stations to be taken over via expansion of the LPFM services.
